

I Claim,

1. A fan blade being integrated with an active carbon filtration layer;  
the blade being perforated with a plurality of through holes with the  
active carbon filtration layer covering up surfaces of each through  
5 hole and the blade.
2. A fan blade as claimed in Claim 1, wherein, the blade is made in the  
form of a hard net and is perforated with a plurality of through  
holes.
